Perforated Vinyl Faced Acoustic Foam

DECI-FOAM V is an ignition retardant flexible polyether polyurethane foam with an attractive functional and hard-wearing perforated vinyl facing. DECI-FOAM V has been designed to maximise the critical mid-frequency sound absorption. This provides optimum noise reduction in operator's cabins of trucks, tractors, etc. It is also highly effective in the speech interference range and for industrial applications.

Film Faced Acoustic Foam

DECI-FOAM F is an ignition retardant polyether polyurethane foam with a tough tear resistant polyurethane film facing. The facing is applied by a patented process which optimises flow resistivity and maximises the sound absorption, it also acts as a protective facing in environments where liquids, spray or dust will contaminate unfaced materials.

Acoustic and sound barrier products are available in variety of different material, above is a small sample of stock available of the shelf.
