

**11.8652**

BE-GE 86-52 is our bus driver seat, developed following many years of experience and co-operation with major bus builders and transportation companies.

Backrest and seat designs are fully functional and easily adjustable to individual driver's needs. Special attention is given to optimum body support and ergonomic requirements.

BE-GE 86-52 is fully trimmed with backrest featuring a single lever adjustment for height together with infinitely variable lumbar support providing constant softness.

A new feature for maximum comfort is the option of the BE-GE air vent system providing a pleasant cool and fresh work environment.
