

Ojop Fasteners – The Original Design

Ojop Sweden is well known in the industrial community for their fasteners. They have studied world markets and built their products to meet the highest quality, service and delivery demands.

We supply industry with the highest quality fasteners possible. Components which enable quick mounting and dismantling of various elements. The strength and function of our fasteners is designed for demanding applications.

Our objective is to give the best possible technical information to the commercial and industrial trade, and particularly to designers. There are three main groups of fasteners – the 700-Series, the 900-Series and the 100-500-Series.

Our product program

700-Series

Manufactured in pressed steel. Utility type, and the most sold catch. A strong and functional fastener.

100-500-Series

The ideal fastener for rugged environments. Shock resistant. Extra strength. Made of drop forged steel. An Ojop speciality.

Strikers and combinations

All possible combinations of striker and fastener, and details as to weights and recommended maximum loads.

Standard material and surface finish

Series	Material	Zinc-plated	316 Stainless	Finish
700	Cold-rolled steel	X	X	Electrolytic brightening
100-150	Wrought steel	X	400-500	Electrolytic brightening

Fasteners for welding installation: no installation holes, raw finish, standard design A.

Fasteners for screw installation: installation holes and surface finish, standard design C.

Ojop manufactures all components used in their products.
