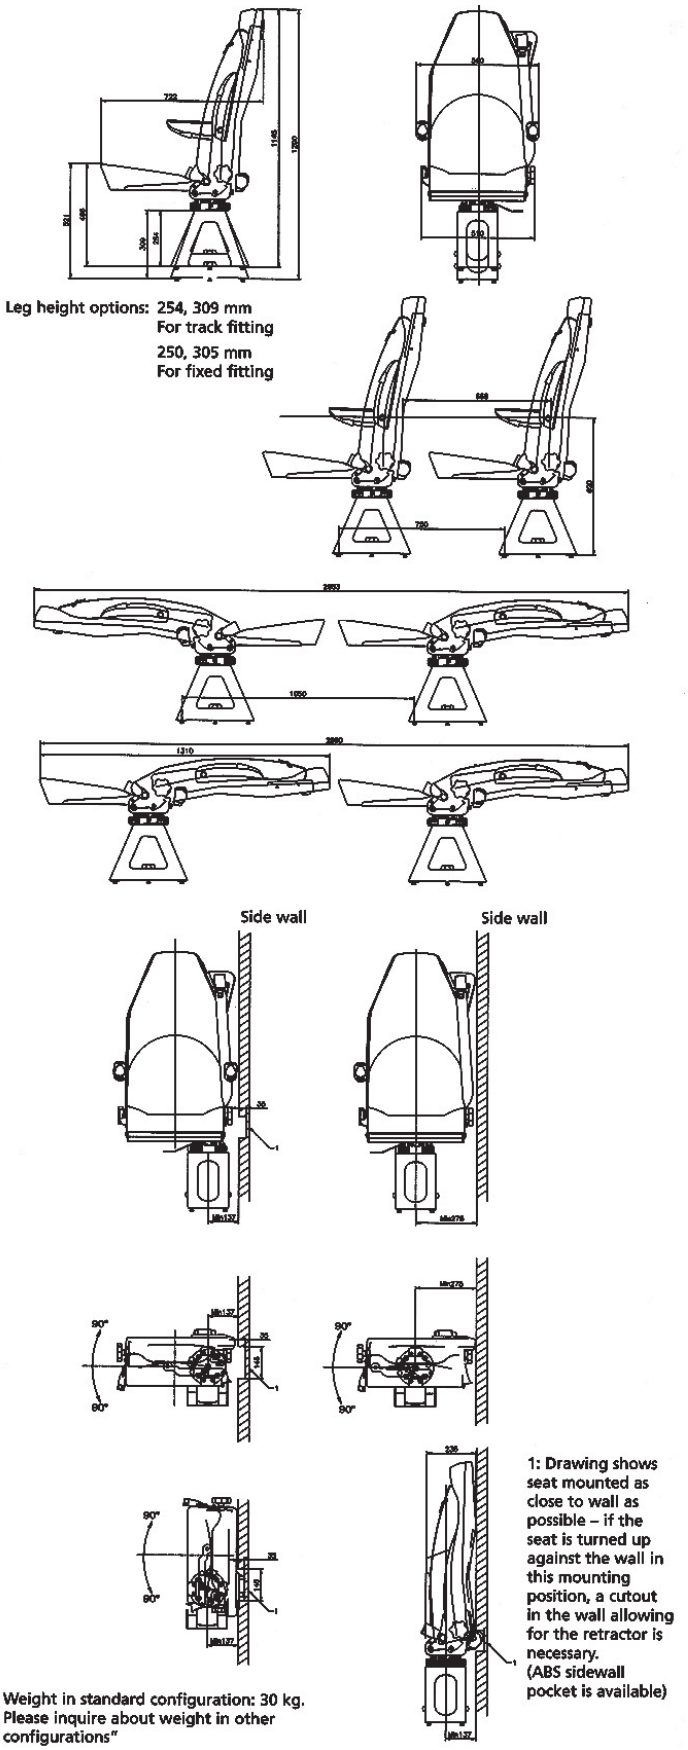
Type 862

ADR Approved

The most flexible M1 seat. Type 862 is the successor to the legendary Type 62. It provides the same high level of comfort and safety as the well-known Type 801 and Type 805, but thanks to its great flexibility it can be flipped away, so that it hardly occupies any space.

This provides maximum space for other purposes, such as transportation of wheelchair occupants, without the necessity to remove any seats from the vehicle.

Type 862 tip seat is equipped with a reclinable backrest with wheel adjuster, integrated three point safety belt and headrest. As options it can be fitted with a 360° swivel, adjustable armrests and compact sub frames in two heights.



Weight in standard configuration: 30 kg. Please inquire about weight in other configurations"
